

MARKET PAGE

- **FIXED:** Expiration Value in TIF now pulls server time rather than local time to correct, TIF getting stuck, orders not being properly updated, and differences in TIF values between web and Swing client(s). ([WEB-31](#))
 - Changes in the WEB-31 involved using server time to calculate timespan for both Bid and Ask TIF where the server pings each client at a configurable set interval, which is now currently set at 250ms.

QUICK ORDER ENTRY (QOE) & MODIFY ORDER

- **FIXED:** Quick Order Dialogue now pops up when user clicks the Eyeball  Icon, representing an IOI order, on the Market Page Bid and Offer columns. ([WEB-225](#))

Note: The fix to correct bug that prevents users from entering a null price on either side of an IOI is queued for later Sprint under same ticket reference.
- **FIXED:** Corrected issue where User Defaults where overriding Quantity/Exchange Values on Modify Order Dialogue. Now Quantity and Exchange values are pulled from read from underlying order. ([WEB-364](#))

Note: The following fixes for the Quick Order Entry (QOE) are queued for the next sprint, Sprint 5, under [WEB-204](#):

 - Correct user preferences from overriding values from underlying cloned order. User preferences on QOE should only apply for TIF values and quantity only when underlying cloned order is sourced from IM Gateway.
 - Update AJAX calls to be synchronous to prevent timing issue where Broker, Exchange, and other inputs being populated from underlying order.

NEW QUOTE ENTRY (NQE)

- **FIXED:** Editable fields, Broker, Exchange, Expires In values are no longer reset upon clicking Create button. ([WEB-200](#))
- **UPDATED:** Strategy Shortname is now displayed instead of Strategy Name in the Strategy field on the New Quote Entry dialogue. ([WEB-339](#))
- **UPDATED:**  Tooltip Help Icon has been updated to be more intuitive. Other updates related to tooltip changes will be carried out in next sprint under ticket ([WEB-333](#))
- **FIXED:** Logic updated to correct issue where strikes were not displaying in the leg table container for some multi leg structures. ([WEB-254](#))

Note: This change is in conjunction with another change under the same ticket which was released in Sprint 3 where the leg table container height was resized from 125 px to 180 px.

Leg	Ratio	PIC	Instrument	Term	Start Date	End Date	Expiry	Strike	PREM
