

Morning.

Higher trade on follow through weather rally, an upward revision to China demand, and positioning ahead of the July USDA S&D report. US weather for this weekend appears to be not as hot as previous. Second week remains hot. China futures ended mixed. In its monthly S&D update, China increased 2019-20 corn and soybean imports by 2 and 3 million tons respectively. China cash crush are slightly higher. Palm was up 9MYR. Malaysian palm oil production during June was reported at an unusually high 1.886 million tons, 102,000 above trade expectations, a marketing year high, while end of June palm oil stocks were reported 34,500 tons below expectations at 1.9 million tons. This bullish undertone was partially offset by a decline in July exports. Cargo surveyors ITS and AmSpec reported a 17.8 percent and 16.8 percent decrease in June 1-10 palm oil shipments from month earlier. Corn is higher while US wheat mixed. US soybean conditions are expected to decline 1-2 on Monday and corn 2-4. Spring wheat could be down 1 and winter wheat will not be reported. French wheat futures are higher after France reported a one-point decline in crop conditions. Argentina is on holiday. FI snapshot for the USDA report is attached.

Weather and Crop Progress

• US soybean conditions are expected to decline 1-2 on Monday and corn 2-4. Spring wheat could be down 1 and winter wheat will not be reported.

CHINA

- Additional torrential rain has occurred south of the Yangtze River overnight
 - Rain totals since Sunday morning have ranged from 4.00 to more than 32.00 inches in much of the Yangtze River Basin perpetuating serious flooding
- European and GFS model runs continue to perpetuate excessive rain in the Yangtze River Basin during the coming ten days, although the daily rainfall will become a little less intensive and less broad-based in the region during the weekend with next week trending wetter again
- 06z GFS model run is wetter in the North China Plain in the second weekend of the two week outlook

The bottom line for China is flooding in the Yangtze River Basin will subside over the next few days, but damage in the region has likely been substantial since June 1 and more flooding will occur as rain increases near and north of the river next week. In the meantime, other areas in China will see a good mix of rain and sunshine to support crop needs. There will be some locally heavy rain in northern parts of the nation, but no area will be subjected to widespread serious flooding like that of the Yangtze River Basin. Some near term drying is expected in northeastern China.

EUROPE/BLACK SEA

- Not much change occurred in the first ten days out of the outlook today
 - France, southern parts of the U.K., portions of Germany, Belgium, Netherlands and a few areas east into western Poland experience net drying

Terry Reilly Grain Research Futures International | 190 S. LaSalle St., Suite 410 | Chicago, IL 60603 W: 312.604.1366 | treilly@futures-int.com

- France has been and will continue to be driest with high temperatures Thursday reaching into the 80s and lower 90s Fahrenheit to accelerate the drying and to more seriously stress some of the nation's crops
 - Temperatures will be seasonable in the coming week and warmer than usual in the July 18-24 period
 - Light rain advertised last evening for France remains in the forecast for a very short period of time in the July 20-22 period
- 06z GFS model did increase some of the rainfall from France into eastern Europe during the July 20-24 period and some of this increase was needed, although the expected rain will be brief

Short term relief from dryness in France July 20-22 will prove to be more of a tease than a big break, but any moisture will be better than none. Southeastern Europe will continue drying out with the Balkan region already becoming too dry except in central Romania. The lower Danube River Bas has been and will continue to be the driest region and a great need for rain will continue.

AUSTRALIA

- No big changes were noted overnight
- Rain will fall today into the weekend from Victoria and southeastern South Australia to Queensland
 Amounts will be light, but all of the moisture will be welcome and beneficial
- Rain is also expected in Western Australia early next week with a similar impact of benefit expected to winter wheat, barley and canola
- Quiet weather is expected to follow for several days after the early week precipitation diminishes

INDIA

- No big changes were noted overnight; rain will continue widespread in much of the nation over the next couple of weeks
 - o A boost in rain would be welcome in the interior west and especially in the northwest

UNITED STATES

- Today's second week seems to be a little wetter than previously advertised especially in the two recent GFS model runs, but to some degree the European model has also trended a little wetter
- World Weather, Inc. stands by its comments from last evening with the southwestern part of the Corn Belt and the southern Plains along with parts of the northern Delta and parts of the Tennessee River Basin most likely to experience net drying for a while
- The outlook has certainly become more favorable for pollination even if the rainfall is overdone, corn loves to have scattered showers warm temperatures and favorable subsoil moisture to promote reproduction and that is exactly what is expected through the next ten days
 - Some of the rainfall will be erratic and light while other areas get a significant amount of moisture, but the bottom line will continue to be more supportive than detrimental to corn pollination – at least through July 20
 - There is still time for greater drying and as we have been saying for an extended period of time we are a little more concerned about soybean and late corn weather in August and September than we are for early corn not that corn will be on easy street
 - We also believe the southwestern Corn Belt (Kansas, Missouri, southwestern Iowa, southeastern Nebraska and southwestern Illinois) and northern Delta will be the areas to watch most closely over the potential for dryness along with the southern Plains

Bloomberg Ag Calendar

FRIDAY, July 10:

- USDA's monthly World Agricultural Supply and Demand (Wasde) report, noon
- China farm ministry's CASDE monthly crop supply- demand report
- Malaysian Palm Oil Board's data on reserves, exports and production in June
- ICE Futures Europe weekly commitments of traders report, 1:30pm (6:30pm London)
- CFTC commitments of traders weekly report on positions for various U.S. futures and options, 3:30pm
- FranceAgriMer weekly update on crop conditions
- Malaysia's palm oil export data for July 1-10
- Cherkizovo trading update
- HOLIDAY: Singapore (election day), Argentina

MONDAY, July 13:

- USDA weekly corn, soybean, wheat export inspections, 11am
- U.S. crop progress, conditions -- soybeans, wheat, cotton, 4pm
- United Nations food security report
- EU weekly grain, oilseed import and export data
- Ivory Coast cocoa arrivals
- Vietnam Customs monthly data on exports of coffee, rice and rubber
- Malaysia's 2Q cocoa grind data
- New Zealand food prices

TUESDAY, July 14:

- China trade data, incl. soybeans, edible oil, rubber and meat & offal imports
- HOLIDAY: France

WEDNESDAY, July 15:

- EIA U.S. weekly ethanol inventories, production, 10:30am
- Brazil chicken, pork group ABPA's press conference on output, exports
- International Sugar Organization's online conference on Covid-19 impact on sugar and alcohol
- Malaysia's palm oil export data for July 1-15

THURSDAY, July 16:

- USDA weekly crop net-export sales for corn, soybeans, wheat, cotton, pork, beef, 8:30am
- Port of Rouen data on French grain exports
- North America 2Q cocoa grindings
- European Cocoa Association 2Q grind data

FRIDAY, July 17:

- ICE Futures Europe weekly commitments of traders report, 1:30pm (6:30pm London)
- CFTC commitments of traders weekly report on positions for various U.S. futures and options, 3:30pm
- FranceAgriMer weekly update on crop conditions
- Cocoa Association of Asia releases 2Q cocoa grind data

China CASDE

In its monthly S&D update, China left its 2020-21 corn and soybean outlooks unchanged and increased 2019-20 corn and soybean imports. China 2019-20 corn imports are predicted to end up near 6 million tons, up 2 million tons from last month. China 2019-20 soybean imports were lifted 3 million tons to 94 million tons.

Corn.

- Corn turned lower around 7 am on a less threatening US weather outlook. At the pause it was down 1.75-2.25 cents. The outlook for week two was a little wetter for both GFS and European models.
- We don't think USDA will change its US corn yield in its S&D report.
- Approximately 10% of the US corn crop is in drought area, compared to 6% last week according to the USDA weekly drought report.

Terry Reilly Grain Research Futures International | 190 S. LaSalle St., Suite 410 | Chicago, IL 60603 W: 312.604.1366 | treilly@futures-int.com

- The USD was slightly lower.
- China was to sell 20,000 tons of pork out of reserves on Friday. Results are awaited.

Corn Export Developments

• None reported

Soybean complex.

- Soybeans are were mixed early this morning. The outlook for week two was a little wetter for both GFS and European models.
- We look for corn and soybean conditions to decrease when reported on Monday
- We heard China bought at least 2-3 soybean cargoes from the US for fall shipment. We are not sure if it was Gulf or PNW.
- Meal was down \$0.30-\$0.50.
- SBO turning slightly higher by the electronic pause.
- Friday is a holiday in Argentina.
- Roughly 5% of the US soybean crop is in drought area, compared to 2% last week according to the USDA weekly drought report.
- Rotterdam values this morning showed soybean oil for the August/September position was up 2 euros from this time previous session, rapeseed oil up 2 in the nearby, and soybean meal when imported from South America 3-4 euros higher.
- Offshore values this morning was leading CBOT soybean oil 20 higher (93 higher for the week to date) and meal \$1.20 lower (\$2.80 higher for the week).
- Cargo surveyors ITS and AmSpec reported a 17.8 percent and 16.8 percent decrease in June 1-10 palm oil shipments from month earlier. Traders were looking for a 15 percent decline. ITS reported 448,516 tons vs. 545,360 same period month ago. AmSpec reported 458,173 tons vs. 550,341 same period month ago.
- Malaysia: Supportive S&D partially offset by bearish July exports.

• China cash crush margins as of this morning, using our calculation, were 89 cents per bushel (87 previous) and compares to 63 cents a week ago and 47 cents around this time last year.

Malaysian palm oil production during June was reported at an unusually high 1.886 million tons, 102,000 above trade expectations, a marketing year high, while end of June palm oil stocks were reported 34,500 tons below expectations at 1.9 million tons, down from 2.030 million tons at the end of May. Exports and implied use were better than expected. June exports were highest in at least 4 years and a high for the marketing year. See our attached tables.

Oilseeds Export Developments

• None reported

Wheat

- Non expiring Chicago wheat was unchanged to lower on positioning after futures hit a 2-month high on Thursday. KC was 2-3.75 cents lower and MN turned lower before the pause after trading higher overnight following Paris wheat.
- FranceAgriMer estimated the soft wheat crop was 55% G/E as of July 6, down from 56% a week earlier and the lowest since 2016. Ten percent of the crop had been harvested.
- Paris December wheat was up 1.50 at 189.25, at the time this was written.
- Russia's AgMin sees the 2020 grain crop at 122.5 million tons, including 75 million tons of wheat, and exports for grain at 43 million ton. They want to increase grain reserves but added that will not happen until the completion of the 2020-21 crop year, meaning exportable supplies could end up larger than expected.
- Around 11% of the US spring wheat crop is in drought area, compared to 27% last week according to the USDA weekly drought report. This reflects the beneficial rains we saw in the Northern Plains the past week.

Export Developments.

- No word yet for Thailand seeking 44,400 tons of feed barley.
- Jordan seeks 120,000 tons of wheat, optional origin, on July 14.
- Ethiopia seeks 400,000 tons of wheat on July 10 for shipment within two months.

Terry Reilly Grain Research Futures International | 190 S. LaSalle St., Suite 410 | Chicago, IL 60603 W: 312.604.1366 | treilly@futures-int.com • Syria seeks 200,000 tons of milling wheat from Russia by July 28.

Rice/Other

• As of July 10, China sold a total of 64,445 tons of cotton from state reserves

Disclaimer

TO CLIENTS/PROSPECTS OF FUTURES INTERNATIONAL, SEE RISK DISCLOSURE BELOW:

THIS COMMUNICATION IS CONVEYED AS A SOLICITATION FOR ENTERING INTO A DERIVATIVES TRANSACTION.

Any trading recommendations and market or other information to Customer by Futures International (FI), although based upon information obtained from sources believed by FI to be reliable may not be accurate and may be changed without notice to customer. FI makes no guarantee as to the accuracy or completeness of any of the information or recommendations furnished to Customer. Customer understands that FI, its managers, employees and/or affiliates may have a position in commodity futures, options or other derivatives which may not be consistent with the recommendations furnished by FI to Customer.

The risk of trading futures and options and other derivatives involves a substantial risk of loss and is not suitable for all persons. In purchasing an option, the risk is limited to the premium paid, and all commissions and fees involved with the trade. When an option is shorted or written, the writer of the option has unlimited risk with respect to the option written. The use of options strategies such as a straddles and strangles involve multiple option positions and may substantially increase the amount of commissions and fees paid to execute the strategy. Option prices do not necessarily move in tandem with cash or futures prices. Each person must consider whether a particular trade, combination of trades or strategy is suitable for that person's financial means and objectives.

This material may include discussions of seasonal patterns, however, futures prices have already factored in the seasonal aspects of supply and demand, and seasonal patterns are no indication of future market trends. Finally, past performance is not indicative of future results.

This communication may contain links to third party websites which are not under the control of FI and FI is not responsible for their content. Products and services are offered only in jurisdictions where solicitation and sale are lawful, and in accordance with applicable laws and regulations in each such jurisdiction.
