# Good morning.

A sharply higher USD (up 30 points as of 7:39 am CT) is doing little to slow an early morning rally. The fundamentals have not changed. High cash prices, tight inventories, and Brazilian weather continues to support prices. April Brazil soybean exports were very large. Some might be eyeing the CFTC fund positions as there is still some room to the upside for managed money to add long positions. Recall there were no record long position posted as of last Tuesday. The USDA soybean crush report was viewed supportive for the soybean products. Malaysian palm fell 19 points and cash was down \$2.50/ton. Overnight Tunisia announced an import tender for 50,000 tons of feed barley and SK is in for 134,994 tons of rice.

## Corn

- CBOT corn is higher on bull spreading on same old news. The fundamentals have not changed. High cash prices, tight inventories, and Brazilian weather continues to support prices.
- Some might be eyeing the CFTC fund positions as there is still some room to the upside for managed money to add long positions. Recall there were no record long position posted as of last Tuesday.
- US corn plantings came in slightly above trade expectations and should be around 50 percent complete by Wednesday. As a coworker mentioned, it's not what's going in the ground but what's in the bins that matters. As of Sunday Iowa was at 69%, Minnesota 60% and Illinois 54% planted.
- On Monday, the funds in corn were flat.
- There were no surprises in USDA's corn for ethanol use for the month of March. DDGS production is on the rise.
- USDA US corn export inspections as of April 29, 2021 were 2,139,077 tons, within a range of trade expectations, above 1,954,012 tons previous week and compares to 1,349,204 tons year ago. Major countries included China for 770,794 tons, Japan for 503,356 tons, and Mexico for 252,032 tons.
- Crude-oil production from OPEC members declined by 50,000 barrels per day in April, according to the latest Bloomberg survey.

## Soybeans

- CBOT soybeans are sharply higher despite a higher USD and China on holiday. April Brazil soybean exports were a very good 14.8 million tons, up from 13.5 million for March and down from 17.4 million from April 2021. The USDA soybean crush report was viewed supportive for the soybean products. Malaysian palm fell 19 points and cash was down \$2.50/ton. Some traders are concerned India demand for palm oil will slow because of the surge in COVID-19 cases.
- USDA March US soybean crush came in 0.1 million bushels below expectations at 188.2 million, 6.1 million per day, up from 5.9 million per day for February and down from 6.2 million for March 2020. Soybean oil stocks declined to 2.245 billion from 2.306 billion at the end of February and are below 2.327 billion a year ago. Stocks were 78 million pounds below a Bloomberg trade guess. Soybean meal stocks also fell to 448,000 short tons from 584,000 at the end of February. We find this bullish SBO and meal relative to soybeans.
- US planting progress at 46% complete for corn and 24% for beans is progressing at a rapid pace.
- China will be on holiday through Wednesday for Labor Day.
- Offshore values were leading CBOT SBO 44 points lower and meal \$1.70 short ton higher.
- Rotterdam vegetable oil values were mixed and Rotterdam meal mostly 4-14 euros higher.
- China cash crush margins on our analysis were 178 cents vs. 178 cents late last week and compares to 132 cents year earlier.
- China: Holiday
- Malaysian palm oil: (uses settle price).

- Funds on Monday sold an estimated net 10,000 soybean contracts, sold 7,000 soybean meal and bought 7,000 soybean oil.
- USDA US soybean export inspections as of April 29, 2021 were 143,418 tons, below a range of trade expectations, below 284,074 tons previous week and compares to 381,177 tons year ago. Major countries included Mexico for 57,978 tons, Costa Rica for 16,697 tons, and Indonesia for 14,566 tons.

#### EIA - U.S. imports of biomass-based diesel increased 12% in 2020

U.S. imports of biomass-based diesel, which include biodiesel and renewable diesel, grew 12% in 2020 to more than 31,000 barrels per day (b/d), increasing for the second consecutive year. Imports of biomass-based diesel increased in 2020 because of growing demand to meet government renewable fuel programs. U.S. consumption of biomass-based diesel, unlike demand for other fuels, remained relatively unaffected by responses to COVID-19 during 2020. https://www.eia.gov/todayinenergy/detail.php?id=47816&src=email

#### **Export Developments**

- Results awaited: Algeria seeks 30,000 tons of soybean meal on April 29 for shipment by June 15.
- Results awaited: Tunisia seeks 27,000 tons of soybean oil and/or rapeseed oil for late June / early July shipment.

#### Wheat

- US wheat was higher this morning on strength in corn. Overnight Tunisia announced an import tender for 50,000 tons of feed barley and SK is in for 134,994 tons of rice.

#### TO CLIENTS/PROSPECTS OF FUTURES INTERNATIONAL, SEE RISK DISCLOSURE BELOW:

THIS COMMUNICATION IS CONVEYED AS A SOLICITATION FOR ENTERING INTO A DERIVATIVES TRANSACTION.

Any trading recommendations and market or other information to Customer by Futures International (FI), although based upon information obtained from sources believed by FI to be reliable may not be accurate and may be changed without notice to customer. FI makes no guarantee as to the accuracy or completeness of any of the information or recommendations furnished to Customer. Customer understands that FI, its managers, employees and/or affiliates may have a position in commodity futures, options or other derivatives which may not be consistent with the recommendations furnished by FI to Customer.

The risk of trading futures and options and other derivatives involves a substantial risk of loss and is not suitable for all persons. In purchasing an option, the risk is limited to the prmium paid, and all commissions and fees involved with the trade. When an option is shorted or written, the writer of the option has unlimited risk with respect to the option written. The use of options strategies such as a straddles and strangles involve multiple option positions and may substantially increase the amount of commissions and fees paid to execute the strategy. Option prices do not necessarily move in tandem with cash or futures prices. Each person must consider whether a particular trade, combination of trades or strategy is suitable for that person's financial means and objectives.

This material may include discussions of seasonal patterns, however, futures prices have already factored in the seasonal aspects of supply and demand, and seasonal patterns are no indication of future market trends. Finally, past performance is not indicative of future results.
