Good morning

We are seeing a widespread internet outage across the US but unsure if this will affect major operations, including USDA services. Grains and the soybean complex are mostly higher on technical buying. There were a few new import tender announcements. USDA due out at 11 am.

WORLD WEATHER HIGHLIGHTS FOR NOVEMBER 9, 2021

- Australia's wet biased weather will end late this week and will be followed by improved weather this
 weekend into next week.
 - That will reduce concern over winter crop quality and help improve crop maturation and harvest progress.
- South America's weather has not changed much today with timely rainfall expected in most of the production areas, although rain amounts are expected to be a little lighter than usual in portions of eastern Argentina and Southern Brazil.
 - o This drier bias is not likely to be great enough to have much influence on the market today.
- Two storms will impact the U.S. northern Plains, Midwest, Delta and southeastern states through the weekend slowing fieldwork and producing some travel delays and a little livestock stress.
 - One storm is expected Wednesday into Friday and the other will occur this weekend.
- China's big snowstorm is winding down today with drier biased weather expected in the northeast into next week starting later this week
 - Other areas in China will experience dry biased conditions over the next full week to possibly ten days
- Southern India will be facing a tropical cyclone Wednesday into Thursday with heavy rain and strong wind speeds possible.
- Europe weather will be relatively tranquil
- Only light amounts of precipitation will impact portions of Ukraine and Russia's Volga River Basin during the next couple of weeks.
- South Africa rainfall will be a little erratic and light in the east while western summer crop areas are left mostly dry for the next ten days.
- Coastal areas of central Vietnam will turn excessively wet over coming week resulting in new flooding and possible property damage

Corn

- Corn futures are higher on technical buying and higher wheat. Corn was down five consecutive days.
 Yesterday's harvest report came in slightly below expectations but favorable weather this week should advance progress.
- China issued its monthly S&D's and they left the corn balance largely unchanged. They did raise old crop corn imports by 3.56 million tons to 29.56 million. USDA may adjust their China corn imports (currently 28MMT) thus reducing global inventories. China in its monthly update took old crop soybean imports up by 1.2 million tons to 99.78, in line with other trade estimates. New crop corn and soybean S&D's (2021-22) were left unchanged.
- Later this morning USDA is due out with their S&D's. We don't look for any fireworks but do see USDA increasing corn for ethanol use by about 50 million bushels.
- Germany reported another case of bird flu on another farm in the northeast.
- Today is the third day if the Goldman roll.
- US corn harvest progress was up 10 points last week to 84 percent after dry weather occurred across
 the heart of the Midwest. Trade was looking for 85 percent. This compares to 90 year ago and 78
 average.

- Look for positioning ahead of the USDA report due out later today. Some traders are looking for USDA to slightly increase the yield and also demand (exports and/or ethanol). We are leaning towards a higher corn for ethanol use.
- Export developments are quiet.
- USDA US corn export inspections as of November 04, 2021 were 563,163 tons, within a range of trade expectations, below 671,085 tons previous week and compares to 692,565 tons year ago. Major countries included Mexico for 318,473 tons, Japan for 134,244 tons, and El Salvador for 49,586 tons.

Export developments.

• Turkey seeks 325,000 tons of corn on November 15 for shipment sought between Dec. 20 and Jan. 20.

TO CLIENTS/PROSPECTS OF FUTURES INTERNATIONAL, SEE RISK DISCLOSURE BELOW:

THIS COMMUNICATION IS CONVEYED AS A SOLICITATION FOR ENTERING INTO A DERIVATIVES TRANSACTION.

Any trading recommendations and market or other information to Customer by Futures International (FI), although based upon information obtained from sources believed by FI to be reliable may not be accurate and may be changed without notice to customer. FI makes no guarantee as to the accuracy or completeness of any of the information or recommendations furnished to Customer. Customer understands that FI, its managers, employees and/or affiliates may have a position in commodity futures, options or other derivatives which may not be consistent with the recommendations furnished by FI to Customer.

The risk of trading futures and options and other derivatives involves a substantial risk of loss and is not suitable for all persons. In purchasing an option, the risk is limited to the premium paid, and all commissions and fees involved with the trade. When an option is shorted or written, the writer of the option has unlimited risk with respect to the option written. The use of options strategies such as a straddles and strangles involve multiple option positions and may substantially increase the amount of commissions and fees paid to execute the strategy. Option prices do not necessarily move in tandem with cash or futures prices. Each person must consider whether a particular trade, combination of trades or strategy is suitable for that person's financial means and objectives.

This material may include discussions of seasonal patterns, however, futures prices have already factored in the seasonal aspects of supply and demand, and seasonal patterns are no indication of future market trends. Finally, past performance is not indicative of future results.

This communication may contain links to third party websites which are not under the control of FI and FI is not responsible for their content. Products and services are offered only in jurisdictions where solicitation and sale are lawful, and in accordance with applicable laws and regulations in each such jurisdiction.
