

Good morning.

USDA: Private exporters reported sales of 100,000 tons of soybeans for delivery to Mexico during the 2021/2022 marketing year. Lower trade in soybeans and soybean meal. Conab reported a supportive Brazil corn production estimate and bearish soybean output. Soybean oil is higher following strength in WTI crude oil. USD is near unchanged and US equities mixed. CBOT corn futures are trading higher. Wheat futures are higher on follow through short covering. Look for positioning today ahead of the USDA reports due out Wednesday.

WORLD WEATHER HIGHLIGHTS FOR JANUARY 11, 2022

- Today's market weather is all about Argentina.
 - o The nation has no soil moisture, and no rain is expected through Saturday morning.
 - Temperatures were in the upper 90s to 108 Fahrenheit (36-42C) Monday and will rise to the range of 100 to 110 (38-43) with extremes to 115 degrees (46C) during the next few days.
 - o Some computer models have been advertising 115 to 122 degree (46-50) highs late this week.
 - Some of the heat advertised is a little overdone; however, 2014 was the last time that Argentina got this hot and World Weather, Inc. still believes the damage to crops and stress to livestock will be at an extreme for the next five days.
 - o Enough heat and moisture stress has already occurred in Argentina in recent week to have hurt production, but conditions over the next five days will be at an extreme.
 - Rain is still expected late this weekend into next week and sufficient amounts will occur to stop
 declining crop conditions in many areas, although southern Argentina crops may not get a good
 soaking for about ten days.
 - Some of the crop damage in Argentina will not be reversible
- In Brazil conditions will continue to decline in Rio Grande do Sul over the next week while conditions farther north in the wetter biased areas of the nation will gradually improve as much needed drier weather evolves in the latter part of this week and lasts into next week.
 - The environment in Brazil north of Rio Grande do Sul should be more favorable for a while following Thursday of this week.
- Not much change in the rest of the world today.
 - o Dry weather will continue in the U.S. Plains, California, Spain and Morocco.
 - Most other areas in Europe in eastern parts of North Africa will experience good weather as will China, Russia and Southeast Asia.

- Queensland, Australia still needs significant moisture while New South Wales summer crops will do well for a while like South Africa.
- There is no threatening cold around the world in winter wheat production areas, although the central and eastern parts of North America will trend colder Jan. 18-25.

Soybeans

- CBOT soybeans are lower on weakness in soybean meal and larger than expected Brazil soybean estimate. Conab reported a surprise for the Brazil soybean crop of 140.5 million tons, much higher than expected by 4.7MMT (135.8MMT average estimate) but still a record.
- Some others may see the dip in soybeans as a buying opportunity as they see the Brazil crop below 140 million tons. Conab is historically slow to revise down their soybean crop in poor weather years, and with harvesting is less than one percent of the total crop the trade has a while to go to see a good picture of the size of the crop.
- Under the 24-hur announcement system, private exporters sold 100,000 tons of soybeans for delivery to Mexico during the 2021/2022 marketing year.

- Anec sees Brazil January soybean shipments reaching 4.274 million tons in January versus 53,644 tons during January 2021.
- USDA US soybean export inspections as of January 06, 2022 were 905,149 tons, below a range of trade expectations, below 1,614,158 tons previous week and compares to 1,909,217 tons year ago. Major countries included China for 577,186 tons, Mexico for 92,622 tons, and Bangladesh for 57,469 tons.
- Cargo surveyor SGS reported month to date January 10 Malaysian palm exports at 325,601 tons, 222,778 tons below the same period a month ago or down 40.6%, and 47,151 tons above the same period a year ago or up 16.9%.
- Malaysian palm futures traded higher by 40 ringgit to 5,069, a 10-week high.
- Malaysian cash CPO was up \$12.50/ton to \$1,262.50.
