WASDE - 622

Approved by the World Agricultural Outlook Board

March 9, 2022

**NOTE:** Russia's recent military action in Ukraine significantly increased the uncertainty of agricultural supply and demand conditions in the region and globally. The March WASDE represents an initial assessment of the short-term impacts as a result of this action.

**WHEAT:** The 2021/22 U.S. wheat supply and demand outlook is for lower supplies, unchanged domestic use, reduced exports, and higher ending stocks. Supplies are lower because imports are reduced 5 million bushels, all for Hard Red Spring wheat, on a slower-than-expected pace. Exports are reduced 10 million bushels, down to 800 million, on weaker than expected sales and shipments for Hard Red Winter and Soft Red Winter. Projected 2021/22 ending stocks are raised 5 million bushels to 653 million but are still 23 percent lower than last year. The season-average farm price (SAFP) is raised \$0.20 per bushel to \$7.50 on NASS prices reported to date and expectations for cash and futures prices the remainder of the marketing year (MY). Despite the recent sharp increases in futures and cash prices, a significant majority of U.S. wheat has already been marketed this MY, limiting the SAFP increase.

The 2021/22 global outlook this month is for higher production, decreased trade and consumption, and larger ending stocks. Global output is raised mainly on an increase for Australia, where an updated ABARES estimate raised production 2.3 million tons to a record 36.3 million. World exports are lowered by 3.6 million tons to 203.1 million, as decreases for Ukraine and Russia are only partly offset by increases for Australia and India. Exports are lowered for Ukraine by 4.0 million tons to 20.0 million, as the conflict in that country is expected to disrupt exports from the Black Sea region. Russia exports are reduced 3.0 million tons to 32.0 million as vessel transportation is expected to be constrained by the conflict and the imposition of economic sanctions. Partly offsetting these reductions are increases for 2021/22 Australian and Indian exports, up 2.0 and 1.5 million tons respectively to 27.5 and 8.5 million. Increased production and competitive prices are expected to boost exports in Australia to a record level. India's robust export pace is expected to continue because of its ample stocks and rising global prices. Imports are lowered for many countries including Turkey, Egypt, the EU, Afghanistan, Algeria, Kenya, Pakistan, Tanzania, and Yemen based on reduced Black Sea wheat export availability and higher world prices. The 2021/22 global use forecast is lowered 0.8 million tons to 787.3 million, on slight decreases in many countries, including India, that more than offset increased feed and residual forecasts for Australia and Ukraine. Global ending stocks are raised 3.3 million tons to 281.5 million, as increased stocks in Russia and Ukraine are only partly offset by declines in Turkey, India, and the EU.

**COARSE GRAINS:** This month's 2021/22 U.S. corn supply and use outlook is for increased food, seed, and industrial use, larger exports, and smaller stocks relative to last month. Corn used for ethanol is raised 25 million bushels to 5.350 billion, based on data through January

from the *Grain Crushings and Co-Products Production* report and weekly ethanol production data as reported by the Energy Information Administration for the month of February. Exports are raised 75 million bushels to 2.500 billion, reflecting expectations of sharply lower exports from Ukraine. The projected season-average farm price is raised 20 cents to \$5.65 per bushel.

Global coarse grain production for 2021/22 is forecast 1.5 million tons higher to 1,498.9 million. This month's foreign coarse grain outlook is for larger production, lower trade, and greater ending stocks relative to last month. Foreign corn production is forecast modestly higher with increases for India and Russia that are partly offset by declines for Argentina and South Africa. India corn production is higher with increases to both area and yield. Argentina corn production is lowered as higher indicated area is more than offset by a reduction in yield. South Africa corn production is down reflecting lower yield prospects.

Corn exports are raised for the United States and India but reduced for Ukraine. Imports are lowered for Egypt, Algeria, Turkey, Israel, India, and Bangladesh. Barley exports are raised for Australia and Canada but reduced for Ukraine. Foreign corn ending stocks are higher, mostly reflecting increases for Ukraine, India, and Russia that are partly offset by reductions for Argentina, South Africa, and Bangladesh. Global corn ending stocks, at 301.0 million tons, are down 1.3 million from last month.

**RICE:** The outlook for 2021/22 U.S. rice this month is for stable supplies, unchanged domestic use, reduced exports, and higher ending stocks. Exports are lowered by 1.0 million cwt to 86.0 million with the decline for medium- and short-grain on the continued weak pace of sales and shipments, particularly to the Middle East. Projected 2021/22 all rice ending stocks are 34.5 million cwt, up 1.0 million from last month but down 21 percent from last year. The projected 2021/22 all rice season-average farm price (SAFP) is \$0.20 per cwt higher at \$15.90 per cwt. The long-grain SAFP is raised \$0.50 per cwt to \$14.00 on expectations of elevated cash and futures prices for the remainder of the marketing year with higher projected U.S. wheat, corn, and soybean prices. However, the medium- and short-grain SAFP is reduced \$0.50 per cwt to \$21.60 on lower-than-expected NASS prices reported to date for California rice.

The 2021/22 global outlook is for larger supplies, higher consumption, increased trade, and higher stocks. Rice supplies are raised 4.9 million tons to 701.6 million, mainly on higher production for India, which is projected at a record 129.0 million tons, up 4.0 million. This is based on the government's *Second Advanced Estimates of Production* and a favorable and extended monsoon season. India's 2020/21 production was also increased by 2.1 million tons to 124.4 million on the final government estimate. Global 2021/22 consumption is increased 0.7 million tons to a record 511.1 million. World trade is 0.5 million tons higher at 51.3 million on greater exports by India and Thailand. India's 2021/22 exports are forecast at 20.5 million tons, surpassing last year's record 20.2 million. Projected 2021/22 world ending stocks are raised 4.2 million tons to a record 190.5 million, primarily on increases for India and Thailand. India accounts for 22 percent of global stocks at 42.0 million tons.

**OILSEEDS:** U.S. soybean supply and use changes for 2021/22 include higher exports and lower ending stocks compared with last month's report. Soybean exports are raised 40 million bushels to 2.09 billion with lower production and reduced exports for South America. Soybean ending stocks are projected at 285 million bushels, down 40 million from last

month. With rising soybean oil prices, soybean oil used for biofuel is reduced this month. Soybean oil exports are raised in response to reduced global sunflowerseed oil trade and tighter global vegetable oil supplies.

Soybean and product prices are all raised this month. The U.S. season-average soybean price for 2021/22 is forecast at \$13.25 per bushel, up 25 cents. The soybean meal price is forecast at \$420 per short ton, up 10 dollars. The soybean oil price is raised 2 cents to 68.0 cents per pound.

Global 2021/22 soybean supply and demand forecasts include lower production, crush, exports, and stocks. Global soybean production is reduced 10.1 million tons to 353.8 million. Brazil's crop is lowered 7.0 million tons to 127 million, Argentina is lowered 1.5 million tons to 43.5 million, Paraguay is lowered 1.0 million tons to 5.3 million, and Uruguay is lowered 0.6 million to 2.0 million. While global soybean crush is lowered 5.0 million tons on a slower-than-expected crush pace for China and lower South American supplies, sunflowerseed crush is reduced another 2.2 million mainly for Ukraine. Major markets impacted by lower Ukrainian sunflowerseed crush and product exports include India and the EU. Lower sunflower product supplies in these markets are partly offset by higher soybean oil imports for India and rapeseed imports for the EU.

Tighter oilseed supplies and high oilseed meal and vegetable oil prices reduce forecasts for global demand growth. Global 2021/22 soybean trade is reduced 6.4 million tons to 158.6 million, with lower exports for South America that are partly offset by higher U.S. exports. Imports for China are reduced 3 million tons to 94 million. Other markets with lower imports include Russia, Bangladesh, Egypt, the EU, Pakistan, Argentina, and Belarus. Global soybean stocks are lowered 2.9 million tons to 90.0 million, the lowest level since 2015/16.

**SUGAR:** USDA projects an increase in 2021/22 U.S. sugar use combined with a reduction in supply to decrease ending stocks to 1,692,320 short tons, raw value (STRV) for an ending stocks-to-use ratio of 13.6 percent. U.S. sugar deliveries for human consumption are increased by 100,000 STRV to 12,300,000 based on strong to-date deliveries by beet processors and on higher-than-expected direct consumption imports through the end of January. U.S. sugar supply for 2021/22 is decreased 26,152 STRV as decreases in sugar production are only partially offset by increases in imports. Florida sugar production is decreased 45,059 STRV to 1,959,570 based on lower sugarcane yield and sucrose recovery from processors' analyses of the effect of late January freezes on the crop. Beet sugar production is decreased 12,183 STRV to 3,995,680 on processors' forecast of lower sucrose extraction and an increase in beet pile shrink. Imports are increased by 31,091 STRV to 3,043,041. Raw sugar TRQ imports are increased by 20,591 STRV based on updated FAS analysis of expected TRQ shortfall. High-tier tariff sugar imports are increased by 25,000 STRV to 175,000. High-tier tariff imports are estimated at 126,272 STRV through the end of February. Raw sugar imports constitute about 62 percent of the total. Since the December 2021 sugar *WASDE*, the USDA has been projecting monthly high-tier tariff refined sugar imports at about 7,250 STRV. Extending this projection across the remaining seven months of the fiscal year yields the 175,000 STRV projection. Imports from Mexico are projected at 1,050,212 STRV, a reduction of 14,500.

The net change for the Mexico 2021/22 sugar supply and use balance is a small 4,000 metric ton (MT) reduction in imports accompanied by a reduction of the same amount in exports.

Exports to the United States for 2021/22 are projected at 898,808 MT, a decrease of 12,410 from last month. Calculated U.S. Needs implied by the March 2022 U.S. Sugar WASDE as set out in the AD/CVD Suspension Agreements is 887,843 MT (1,037,400 STRV). There is an additional export amount of 10,965 MT (12,812 STRV) from the 2020/21 export allocation to Mexico that was permitted by the U.S. Department of Commerce to enter the United States after September 30. Exports other than to the United States under export license increase by 8,410 MT to 852,025.

**LIVESTOCK, POULTRY, AND DAIRY:** The 2022 forecast for total red meat and poultry production is lowered slightly from last month, as higher forecast beef and turkey production is more than offset by lower projections for pork and broilers. The beef production forecast is raised from the previous month on higher fed and non-fed cattle slaughter. Pork production is lowered on a slower pace of slaughter and slightly lighter carcass weights. Broiler production is lowered on lower slaughter to date and a slower-than-expected recovery in hatchability. Turkey production forecasts are raised on early-year hatchery data. The egg production forecast is reduced on slower expected growth in first-half production. Supply and use estimates for 2021 are adjusted for revisions in production and stock data.

Beef import and export forecasts are raised from last month based on recent trade data. Pork imports are raised on strong domestic prices, while exports are reduced on increased competition in a number of Asian markets. The broiler export forecast is reduced as higher prices reduce export opportunities. The turkey export forecast is reduced from last month primarily as recent discoveries of Highly Pathogenic Avian Influenza have resulted in import restrictions by Mexico.

Fed-cattle prices are raised on firm packer demand and declining inventories of fed cattle. Hog prices are raised on observed prices to date and expected strength in demand. Broiler, turkey, and egg price forecasts are raised on current prices and relatively slow production growth.

The milk production forecast for 2022 is lowered from last month, on lower dairy cow numbers and slower growth in milk per cow. The fat basis import forecast is lowered on lower expected imports of cheese and butterfat products, while exports are reduced on lower shipments of whole milk powder and whey. On a skim-solids basis, the import forecast is raised, primarily as higher imports of milk proteins more than offset weaker cheese imports. The export forecast is reduced on weaker expected sales of whey products and skim milk powders. Changes in 2021 estimates of supply and use reflect revised production and stock data.

Price forecasts for cheese, butter, nonfat dry milk, and whey are raised from the previous month on current prices, lower expected production, and continued demand strength. With higher product prices, both Class III and the Class IV prices are raised. The 2022 all milk price forecast is increased to \$25.05 per cwt.

**COTTON:** This month's 2021/22 U.S. cotton supply and demand forecasts are unchanged relative to last month. The projected marketing year average price received by upland producers is also unchanged, at 90 cents per pound.

In the world 2021/22 cotton balance sheet, ending stocks are 1.7 million bales lower than a month earlier. A 300,000-bale decrease in production accounts for some of this change, but most of the decline stems from lower beginning stocks, reflecting updated Indian consumption estimates for 2019/20 and 2020/21 to reflect Indian government sources. Projected world 2021/22 consumption is marginally higher this month, up 111,000 bales, but with a 1-million-bale increase in the 2020/21 global estimate, March's projected consumption growth rate is lower this month. World consumption is now expected to grow 2.1 percent from a year earlier, below the 2.8 percent rate forecast in February. Production is projected lower as a 500,000-bale reduction in India's crop more than offsets a 150,000-bale increase for Mexico.

Approved by the Secretary of Agriculture and the Chairman of the World Agricultural Outlook Board, Mark Jekanowski, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

APPROVED BY:

SETH MEYER  
SECRETARY OF AGRICULTURE DESIGNATE

## INTERAGENCY COMMODITY ESTIMATES COMMITTEES

*Note: The World Agricultural Outlook Board reviews and approves the World Agricultural Supply and Demand Estimates (WASDE) report. The Board's analysts chair the Interagency Commodity Estimates Committees (ICECs) that prepare the monthly report.*

Other States 1/	11.60	13.00	13.90	14.40

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of ending stocks by type (in mil. cwt): 2017/18-1.4; 2018/19-2.1; 2019/20-1.0. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in breakens between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The California medium/short-grain season-average- farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. 10/ Marketing year beginning October 1.

1/ Fiscal years beginning Oct 1. Data and projections correspond to category components from "Sweetener Market Data" (SMD).

2/ Production projections for 2020/21 and 2021/22 are based on Crop Production and/or processor projections/industry data and/or sugar ICEC analysis where appropriate. 3/ For 2020/21, WTO raw sugar TRQ shortfall (114) and for 2021/22 (230). 4/ Composed of sugar under the re-export and polyhydric alcohol programs. 5/ Imports from Mexico; and high-tier tariff sugar and syrups not otherwise specified -- for 2019/20 (206), 2020/21 (186), and 2021/22 (175). 6/ Transfers accompanying deliveries for sugar-containing products to be exported (SCP) and polyhydric alcohol manufacture (POLY), and deliveries for livestock feed and ethanol. Total refiner license transfers for SCP and POLY inclusive of WASDE-reported deliveries: 2019/20 -- 298; estimated 2020/21 -- 298; projected 2021/22 -- 313.

## Mexico Sugar Supply and Use and High Fructose Corn Syrup Consumption 1/

		Beginning Stocks	Production	Imports	Domestic 2/	Exports	Ending Stocks
<i>1,000 Metric Tons, Actual Weight</i>							
<b>Sugar</b>							
2020/21 Est.	Feb	858	5,715	65	4,420	1,165	1,053

## U.S. Dairy Prices

	2019	2020	2021 Est. Feb	2021 Est. Mar	2022 Proj. Feb	2022 Proj. Mar
<b>Product Prices 1/</b>						
Cheese	1.7586	1.9236	1.6755	1.6755	1.900	2.030
Butter	2.2431	1.5808	1.7325	1.7325	2.390	2.575
Nonfat Dry Milk	1.0419	1.0417	1.2693	1.2693	1.665	1.740
Dry Whey	0.3799	0.3621	0.5744	0.5744	0.705	0.710
<i>Dollars Per Pound</i>						
<b>Milk Prices 2/</b>						
Class III	16.96	18.16	17.08	17.08	20.30	21.65
Class IV	16.30	13.49	16.09	16.09	22.30	23.70
All Milk 3/	18.65	18.24	18.69	18.69	23.55	25.05
<i>Dollars Per Cwt</i>						

1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

**Reliability of March Projections 1/**

Note: Tables on pages 35-37 present a record of the March projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 0.5 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 0.9 percent. The average difference between the March projection and the final estimate is 2.4 million tons, ranging from 0 million to 8 million tons. The March projection has been below the estimate 29 times and above 11 times.

## Related USDA Reports

---

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

---

## Supply and Demand Database

---

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <https://apps.fas.usda.gov/psdonline/app/index.html>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

---

## Foreign Production Assessments

---

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the International Production Assessment Division (IPAD) of the Foreign Agricultural Service. IPAD is located at <https://ipad.fas.usda.gov/>.

---

## Metric Conversion Factors

---

**1 Hectare = 2.4710 Acres**

**1 Kilogram = 2.20462 Pounds**

## **World Agricultural Supply and Demand Estimates**

### **WASDE-622 – March 9, 2022**

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
