December 9, 2022

WHEAT: This month's 2022/23 U.S. wheat supply and use outlook is unchanged from last month. There are offsetting changes for exports by-class with Hard Red Spring and White higher and Soft Red Winter lower. The 2022/23 season-average farm price is forecast \$0.10 per bushel lower at \$9.10, based on prices received to date and expectations for futures and cash prices for the remainder of 2022/23.

The global wheat outlook for 2022/23 wheat is for reduced supplies, lower consumption, increased trade, and reduced stocks. Supplies are lowered 2.1 million tons to 1,056.9 million on reduced production for Argentina and Canada that is only partly offset by higher Australia production. Argentina is lowered 3.0 million tons to 12.5 million with reductions in both area harvested and yield on continued widespread dry conditions. This would be the lowest production since 2015/16. Canada's production is reduced 1.2 million tons to 33.8 million, based on the latest Statistics Canada estimate and is the third largest crop on record. Australia's production is raised 2.1 million tons to a record 36.6 million, based on the latest Australian Bureau of Agricultural and Resource Economics (ABARES) forecast.

Global consumption is reduced 1.6 million tons to 789.5 million, mainly on lower feed and residual use by the EU and Ukraine. World trade is raised 2.2 million tons to 210.9 million on higher exports by Australia, Ukraine, the EU, and Russia more than offsetting reduced exports by Argentina. Australia exports are raised 1.5 million tons to a near-record 27.5 million. Because of excessive rains in New South Wales at harvest, Australia's feed wheat supplies are expected to be greater for 2022/23 and competitively priced against feed grains for East Asian importers. This resulted in higher imports for South Korea and several Southeast Asian countries this month. Ukraine exports are increased 1.5 million tons to 12.5 million. Argentina's exports are reduced 2.5 million tons to 7.5 million with lower exportable supplies. This would be Argentina's lowest exports since 2014/15. Projected 2022/23 ending stocks are decreased 0.5 million tons to 267.3 million as reductions for Russia, Canada, Argentina, and Ukraine more than offset increases for the EU and Australia.

COARSE GRAINS: This month's 2022/23 U.S. corn outlook is for lower exports and greater ending stocks. Exports are lowered 75 million bushels as competition from other exporters and relatively high U.S. prices have resulted in slow sales and shipments through early December. With no other use changes, corn ending stocks are raised 75 million bushels. The season-average corn price received by producers is lowered 10 cents to \$6.70 per bushel based on observed prices to date.

For 2022/23 sorghum, a substantial decline in demand from China supports greater domestic use expectations. Exports are lowered 20 million bushels, with offsetting increases to food, seed, and industrial and feed and residual use.

Global coarse grain production for 2022/23 is forecast down 5.9 million tons to 1,453.6 million. The 2022/23 foreign coarse grain outlook is for lower production, greater trade, and smaller stocks relative to last month. Foreign corn production is reduced with forecast declines for Ukraine, Russia, the EU, and Vietnam. Ukraine corn production is sharply lower with reductions to both area and yield as the ongoing conflict and record-setting autumn rainfall have delayed the harvest in key producing oblasts of Poltava, Sumy, and Cherkasy. Russia corn production is lowered as harvest delays in the country reduce area expectations. Barley production is raised for Australia based on the most recent crop report from ABARES. Argentina barley production is cut on continued dry conditions.

Corn exports are raised for Ukraine but lowered for the United States, Russia, and the EU. Barley exports are raised for Australia but lowered for Argentina. For 2021/22, sorghum exports for Argentina are lowered for the local marketing year beginning March 2022, based on shipments through the month of November. For 2022/23, corn imports are raised for the EU, but lowered for Canada, Iran, South Korea, Mexico, Vietnam, Philippines, and Turkey. Sorghum imports are reduced for China. Foreign corn ending stocks are down, reflecting reductions for Ukraine, Paraguay, Vietnam, and Mexico. Global corn stocks, at 298.4 million tons, are down 2.4 million.

RICE: The outlook for 2022/23 U.S. rice is for unchanged supplies and domestic use, lower exports, and higher stocks compared with last month. The export forecast is reduced 2.0 million cwt to 69.0 million, all long-grain, based on a slow pace of shipments and sales and would be the lowest level since 1991/92. Rough rice exports are reduced 2.0 million cwt to 23.0 million, which would be the lowest level since 2000/01. Ending stocks are forecast 2.0 million cwt higher to 38.1 million.

The 2022/23 season average farm price (SAFP) forecasts for all medium- and short-grain rice and all-rice were both lowered as the proportion of California rice for 2022/23 is expected to be smaller. The medium- and short-grain SAFP forecast is lowered \$0.90 per cwt to \$29.10 and the all-rice SAFP forecast is lowered \$0.90 per cwt to \$19.00. The SAFP for long-grain rice is unchanged at \$16.50 per cwt.

The 2022/23 global outlook has slightly lower supplies, less consumption, increased trade, and slightly reduced ending stocks compared with last month. Supplies are lowered 1.2 million tons to 685.6 million, primarily on lower beginning stocks for Vietnam and Thailand and reduced production in Australia and the EU. The global consumption forecast declines 0.9 million tons to 516.9 million, primarily on a reduction for India. Trade is forecast 0.9 million tons larger to 53.7 million tons, mainly on increased exports for India, Thailand, and Vietnam. Global 2022/23 ending stocks are reduced by 0.4 million tons to 168.6 million, the lowest since 2017/18.

OILSEEDS: Total U.S. oilseed production for 2022/23 is forecast at 127.9 million tons, up slightly due to an increase for cottonseed. Soybean supply and use projections for 2022/23 are unchanged from last month. Based on a review of EPA's recent proposed rule for renewable fuel obligation targets, soybean oil used for biofuel for 2022/23 is reduced 200 million pounds to 11.6 billion. Soybean oil exports are also reduced on historically low export sales through November. With reduced use of soybean oil for biofuel and exports, food use and ending stocks are raised. The U.S. season-average soybean price forecast is

unchanged at \$14.00 per bushel. The soybean oil price is reduced 1 cent per pound to 68 cents. The soybean meal price forecast is increased \$10.00 to \$410.00 per short ton.

Global oilseed production for 2022/23 is projected at 644.4 million tons, down 1.2 million from last month. Lower sunflower, rapeseed, palm kernel, and cottonseed production forecasts are partly offset by higher soybean output. Global sunflowerseed production is reduced for Russia and Ukraine based on harvest results. Canola production for Canada is lowered 0.5 million tons to 19.0 million based on government reports. Palm kernel and palm oil production is lowered for Indonesia for 2021/22, reflecting crop losses during periods of export restrictions and poor harvest weather. Indonesian palm oil production for 2022/23 is also lowered 1.0 million tons to 45.5 million.

The global soybean outlook includes higher production, exports, and ending stocks. Production is raised on higher output for India and Ukraine. Exports are raised slightly as higher shipments for Argentina are partly offset by lower exports for Canada and Paraguay. With global crush relatively unchanged, ending stocks are raised 0.5 million tons to 102.7 million.

SUGAR: U.S. sugar supply in 2022/23 is virtually unchanged from last month as projected changes in production are counterbalanced by projected imports of sugar from Mexico in accordance with the terms of the CVD Suspension Agreements. Beet sugar production is lowered 66,980 short tons, raw value (STRV) to 4.927 million. Beet processors reduced their forecast of sugarbeets available for slicing by 252,846 tons in their December forecast published in Sweetener Market Data. An increase in cane sugar production partially offsets the beet sugar decline. Cane sugar production in Louisiana is increased by 18,460 STRV to 2.025 million. Although NASS decreased its sugarcane yield to 32.2 tons/acre from 32.4, production is increased on more cane area for sugar instead of for seed and a 1.01 percent increase in recovery projected by processors. Cane sugar in Texas is increased slightly on processor reporting. Imports from Mexico are projected based on fulfilling U.S. Needs according to components from this December WASDE which will be used by the Department of Commerce in establishing the Export Limit as of January 1, 2023. There are no changes to use. Ending stocks are residually projected at 1.707 million STRV for an ending stocks-to-use ratio of 13.5 percent, virtually unchanged from last month.

On November 23, Customs and Border Protection (CBP) issued a Withhold Release Order (WRO) against Central Romana Corporation in the Dominican Republic (DR) on alleged use of forced labor and other factors. The WRO prohibits entry into the United States of raw sugar and sugar-based products produced by the company. The USDA has determined that the DR sugar industry intends to re-configure distribution in the local sugar market and re-arrange the company level allotments of the TRQ with the local mills to meet its full 2022/23 raw sugar TRQ allocation.

USDA projects Mexico sugar production for 2022/23 the same as last month at 5.900 million metric tons (MT). CONADESUCÁ released its 2022/23 forecast of 6.026 million MT in November. The USDA adopts CONADESUCÁ projected sugarcane yield of 64.06 MT/hectare and recovery of 11.30 percent, but projects area harvested only at 814,850 hectares, up about 15,000 hectares from last month but less than CONADESUCÁ's forecast of 832,245. Exports are projected at 1.266 million MT and almost all (barring a small amount exported in October) is intended for the U.S. market under export license. Ending stocks are

projected at a level covering 2023/24 use for 2.5 months prior to next season's campaign. Shipments to IMMEX are reduced by 38,886 MT to 494,114 to accommodate exports to the U.S. market.

LIVESTOCK, POULTRY, AND DAIRY: The forecast for 2022 red meat and poultry production is raised from last month as higher beef, broiler, and turkey forecasts for the fourth quarter are partly offset by lower pork. Beef production is raised with higher expected cattle slaughter as well as heavier carcass weights. Pork production is lowered on lighter carcass weights. Broiler and turkey production are raised on current slaughter and hatchery data. Egg production is raised slightly on revised third-quarter data.

For 2023, the beef forecast is unchanged, with offsetting first and second quarter changes. Broiler production is raised on more rapid expected growth in bird numbers later in the year. Turkey production is lowered for the first half of the year on recent discoveries of Highly Pathogenic Avian Influenza. Egg production is reduced on a slower expected pace of recovery.

Beef imports for 2022 are unchanged, but exports are raised on recent data. Exports are raised for 2023 on expectations of continued momentum to East Asian markets. Pork imports and exports for 2022 are both lowered on recent data. Pork imports for 2023 are lowered slightly, while exports are unchanged. The broiler export forecast for 2022 is raised on recent trade data, while 2023 exports are lowered. Turkey exports are unchanged, but imports are raised for both years on current data and tightness in domestic supplies.

Price forecasts for cattle, hogs, and broilers are unchanged for 2022 and 2023. The turkey price forecast for 2022 is lowered on current price data, but the forecast for 2023 is unchanged. Egg price forecasts for 2022 and 2023 are raised on recent prices and expectations of continued firm demand and tight supplies.

The milk production forecast for 2022 is unchanged from last month. The 2023 production forecast is raised slightly with both higher expected cow numbers and slightly more rapid growth in output per cow.

Fat and skim-solids basis imports for 2022 are raised, driven by recent trade data and expectations of continued demand for imported cheese and butterfat products. Forecasts for 2023 fat basis and skim-solids basis imports are raised on imports of butter and milk proteins, respectively. Exports on a fat basis for 2022 and 2023 are raised on butter and casein. Exports on a skim-solids basis are raised in 2022 as higher nonfat dry milk (NDM) more than offsets lower lactose. The 2023 forecast is reduced on lower lactose shipments.

For 2022, forecasts for butter and cheese are raised on recent prices and expectations of continued strength in demand, but whey and NDM prices are unchanged. The Class III price is raised on the higher cheese price and the Class IV price is raised on the higher butter price. For 2023, the price forecasts for cheese and butter are raised as demand strength carries into 2023, but prices for NDM and whey are lowered on pressure from international markets. The higher cheese price more than offsets the lower whey price and the Class III price is raised while the Class IV price forecast is lowered, reflecting the lower NDM price. The 2022 all milk price forecast is raised to \$25.65 per cwt and the 2023 all milk price is raised to \$22.70 per cwt.

COTTON: This month's 2022/23 U.S. cotton forecasts include higher production and ending stocks but lower mill use and exports. Production is 211,000 bales higher—at 14.2 million bales—mainly due to higher yields in the Delta and Southeast. Mill use is lowered 100,000 bales reflecting reduced spinning levels to date and weaker expectations for future demand. A reduction in expected world demand and trade results in a 250,000-bale decrease for U.S. cotton exports, down to 12.25 million. Ending stocks are now expected to be 500,000 bales higher than they were a month earlier, but the upland cotton season-average farm price is unchanged at 85 cents per pound.

The global 2022/23 cotton forecasts include lower production, consumption, and trade, but higher ending stocks. Production is down 700,000 bales from the previous month's forecast, led by an 800,000-bale decline in Pakistan's flood-damaged crop. Australian production is estimated 500,000 bales lower, and Mali's crop is reduced 120,000 bales. Higher than expected yields in Turkey resulted in a 500,000-bale upward revision. Global consumption is down 3.3 million bales from the previous month, and on a year-to-year basis world cotton use is now projected to decline 4.9 percent, similar to the decline experienced in 2021/22. This month's changes to 2022/23 consumption include 1.0-million-bale reductions for China and India, and smaller reductions for Pakistan, Turkey, and Vietnam. Projected world trade is cut 950,000 bales this month, with imports reduced for China, Turkey, and Vietnam. Exports are reduced for Australia, Mali, Malaysia, India, and Brazil. World ending stocks are projected 2.3 million bales higher this month, and at 89.6 million bales are 4.1 million higher than in 2021/22.

Approved by the Secretary of Agriculture and by the Chairman of the World Agricultural Outlook Board, Mark Jekanowski, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

Other States 1/	13.00	13.90	17.40	17.40

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of ending stocks by type (in mil. cwt): 2017/18-1.4; 2018/19-2.1; 2019/20-1.0. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in breakens between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The California medium/short-grain season-average- farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. 10/ Marketing year beginning October 1.

1/ Fiscal years beginning Oct 1. Data and projections correspond to category components from "Sweetener Market Data" (SMD). 2/ Production projections for 2021/22 and 2022/23 are based on Crop Production and/or processor projections/industry data and/or sugar ICEC analysis where appropriate. 3/ For 2021/22, WTO raw sugar TRQ shortfall (77) and for 2022/23 (255). 4/ Composed of sugar under the re-export and polyhydric alcohol programs. 5/ Transfers accompanying deliveries for sugar-containing products to be exported (SCP) and polyhydric alcohol manufacture (POLY), and deliveries for livestock feed and ethanol. Total refiner license transfers for SCP and POLY inclusive of WASDE-reported deliveries: 2020/21 -- 298; estimated 2021/22 -- 314; projected 2022/23 -- 315

<i>Dollars Per Pound</i>						
Milk Prices 2/						
Class III	18.16	17.08	21.80	21.95	19.65	19.80
Class IV	13.49	16.09	24.30	24.50	20.35	20.10
All Milk 3/	18.13	18.53	25.50	25.65	22.60	22.70
<i>Dollars Per Cwt</i>						

All prices are January-December averages. 1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Reliability of December Projections 1/

Note: Tables on pages 35-37 present a record of the December projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 0.8 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 1.3 percent. The average difference between the December projection and the final estimate is 3.7 million tons, ranging from 0.4 million to 10.2 million tons. The December projection has been below the estimate 30 times and above 11 times.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. Marketing years 1981/82 through 2021/22 for grains, soybeans, and cotton. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2021/22. Calendar years 1982 through 2021 for meats, eggs, and milk. Final for animal products is defined as the latest annual production estimate published by NASS for 1982-2021.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <https://apps.fas.usda.gov/psdonline/app/index.html>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the International Production Assessment Division (IPAD) of the Foreign Agricultural Service. IPAD is located at <https://ipad.fas.usda.gov/>.

U.S. DEPARTMENT OF AGRICULTURE

Hybrid
Event

USDA's 99th Annual Agricultural Outlook Forum

U.S. Agriculture: Seeds of Growth Through Innovation

February 23-24, 2023

You're invited to USDA's largest annual gathering and the agricultural sector's premier event—the 2023 Agricultural Outlook Forum. The Forum will be held in person on February 23-24, 2023, at the Crystal City Gateway Marriott, Arlington, VA and all sessions will be livestreamed.

The program will feature an exceptional lineup of topics and speakers!

- Join Chief Economist Seth Meyer as he unveils USDA's initial forecast for the agricultural economy, commodity markets, and trade in 2023 and discuss U.S. farm income situation.
- Learn from more than 100 subject matter experts, executives and academics as they discuss some of the most pressing issues impacting agriculture and potential solutions.
- Get the latest on supply chain challenges and solutions, climate-smart agriculture and more!

Participants can attend the Agricultural Outlook Forum in person or virtually. Registration is required for both virtual and in-person attendance. There is no cost to attending the Forum virtually.

For more information, see the Forum's [Program at a Glance](#)

Don't miss your chance to hear the latest updates from industry leaders.

World Agricultural Supply and Demand Estimates

WASDE-631 – December 9, 2022

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
