EOX MARKET DATA · FORWARD CURVES

Global Crude Oil Forward Curves

Marker Crudes, Regional Streams and the Differentials Between Them

Daily forward curves for more than 130 crude oil products, from the global marker crudes to North American, North Sea, Middle East and Asian streams, with spreads and differentials published directly, built on real brokerage activity and calibrated by statistical modelling.

COVERAGE

Every Major Basin

North America in Depth, and the Global Marker Complex

100
North American products

38
marker and international products

48
published as spreads

North America

US Gulf Coast — 41
Light sweet, medium sour and heavy streams at Gulf Coast hubs and export terminals.

US Midwest, Permian & Bakken — 36
Inland hub and basin pricing, including Permian and Bakken streams and storage points.

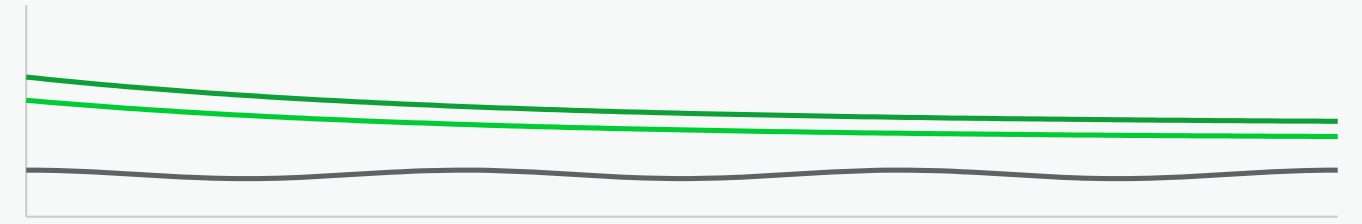

Canada & Alaska — 23
Oil sands heavy, synthetic and light sweet streams, plus Alaskan crude.

Global

Global markers — 12
The major marker crudes and the spreads between them.

North Sea, Europe & CIS — 10
North Sea, Mediterranean and CIS export streams.

Middle East & Asia — 16
Gulf export grades and Asian pricing points.

Illustrative curve shapes. Not current prices.

Differentials built in
Inter-marker, location and quality differentials are published directly, ready for arbitrage, basis and crude-slate analysis.

Terminal and storage level
Beyond the main hubs, EOX prices individual Gulf Coast terminals and inland storage points alongside the streams that flow through them.

HOW IT'S BUILT & WHO USES IT

Built on Real Brokerage Activity

Calibrated by Statistical Modelling, Applied Consistently

Brokerage activity

Trades and quotes from BGC Group's energy and commodities brokerage desks anchor each curve where the market trades.

Public information

Publicly available information supplements observed activity with shapes, spreads and location relationships.

Statistical modelling

Long histories supply seasonal shapes, spreads and correlations, so every point on the curve is priced, liquid or not.

How a full EOX curve is built along its length. Illustrative; not market data.

A proprietary, rules-based algorithm marks every curve the same way, every run: not hand-marked, and independent of your own positions, which reduces self-pricing risk. EOX aims to correct any error within one business day, and can often republish within the hour.

Who uses EOX crude curves

Teams that need an independent, defensible forward reference

Refiners

Crude slate economics, feedstock budgeting and margin analysis.

Producers & midstream

Hedging, terminal and pipeline valuation, and netback analysis.

Trading & risk teams

Independent marks, arbitrage analysis and risk inputs.

Consultancies & lenders

Reserve and asset valuation, and client advisory work.

Typical applications

- Verifying internal marks and mark-to-market
- Crude slate and refining economics
- Location and quality arbitrage
- Midstream and terminal valuation
- Risk models: VaR, PFE and stress tests
- Audit and governance support

DELIVERY & ACCESS

Every Way In, One Subscription

The Same Curves and Timestamps, Wherever You Pull Them

Every EOX subscription includes every delivery method, with historical curves at no extra charge. Subscriptions are priced by product complex, not by curve.

REST API
Per-user keys, JSON or CSV over HTTPS, with history on request.

Excel add-in
Curves, history and dates straight into your models with EOX formulas.

File downloads
Every end-of-day file, today's or historical, from a web browser.

FTPES
Secure file transfer for automated loads into ETRM and risk systems.

Email
Formatted daily files delivered to your inbox through the day.

Partner platforms
Enverus, DTN, ZEMA, Barchart, Abacus SATURN and Ventriks, licensed with EOX.

Crude curves at a glance

Curves	130+ (100 North American, 38 international)
Spreads	48 published directly
Depth	Curves to 10 years
Granularity	Hubs, terminals and storage points

Publication

Intraday	Curves refreshed every 15 minutes through the trading day
Daily runs	Five scheduled publication runs, from 6:45 am to 4:00 pm US Central Time
History	Included with every subscription
Timing	Exact timing varies by dataset and delivery method

Want the curve-by-curve list?

This brochure summarises coverage. The complete list of curves in EOX crude curves is available to clients and trial users: ask for it with your trial.

See EOX crude curves in your own models

Request a trial and we'll set up access and send the full coverage list.
