EOX MARKET DATA · FORWARD CURVES

Freight & Coal Forward Curves

Tankers, Gas Carriers, Dry Bulk and Containers, Plus Seaborne and US Coal

Forward curves for shipping routes across clean and dirty tankers, LNG and LPG carriers, dry bulk and containers, alongside seaborne and US domestic coal, built on real brokerage activity and calibrated by statistical modelling.

FREIGHT COVERAGE

Global Shipping Routes

Wet Freight, Gas Carriers, Dry Bulk and Containers

45 tanker and gas carrier routes

5 dry bulk curves

4 container lanes

Clean tankers — 21

Refined product lanes linking Northwest Europe, the US Gulf, the Mediterranean, the Middle East, Asia, Brazil and Australia.

Dirty tankers — 14

Crude lanes from the Middle East to Asia, West Africa to Europe, the US Gulf to Europe and Asia, and North Sea and Caribbean routes.

LNG carriers — 6

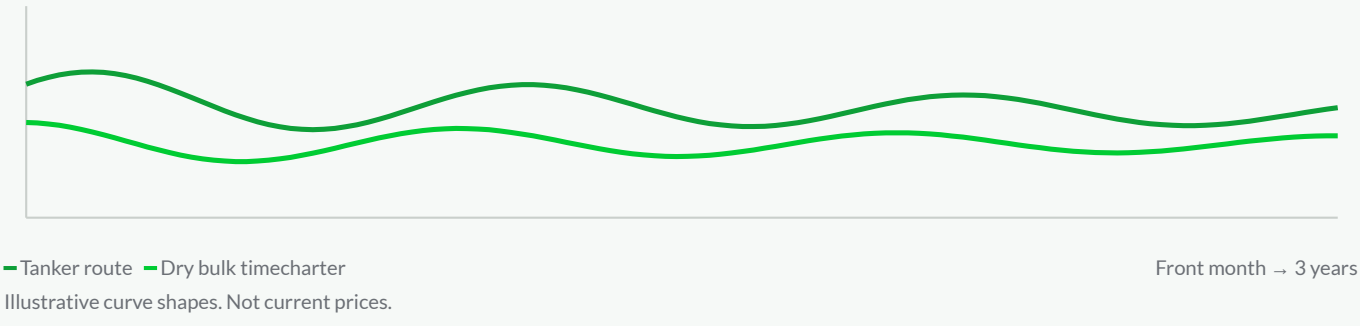

Atlantic and Pacific LNG shipping, including US Gulf to Europe and Australia to China.

LPG carriers — 4

US Gulf to Asia and Middle East to Asia LPG shipping.

Dry bulk & containers — 9

Timecharter curves for the main bulk-carrier classes (Capesize to Handysize), and four East–West container lanes.

Tanker route · Dry bulk timecharter

Front month → 3 years

Illustrative curve shapes. Not current prices.

Carbon cost included, side by side

Selected tanker routes are published both with and without EU Emissions Trading System costs, so voyage economics can be compared with and without carbon.

COAL COVERAGE

Seaborne and US Coal

Thermal and Coking Coal Across Three Regions

15	14	1
coal curves	thermal / steam coal	coking coal

Asia-Pacific — 8

Australian, Indonesian and South China thermal coal, including sub-bituminous grades, plus Australian coking coal.

United States — 5

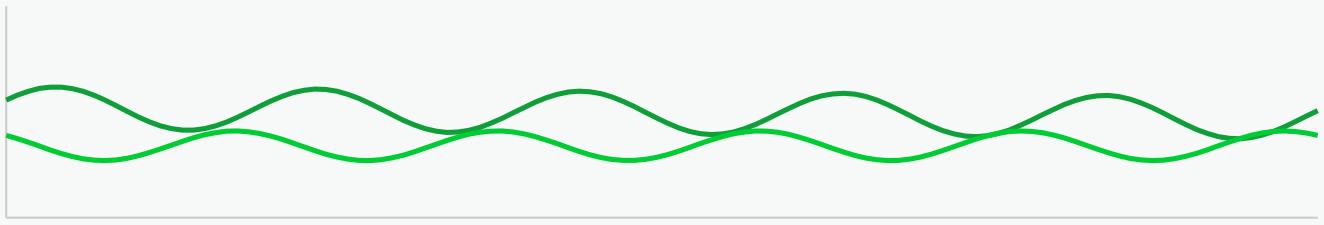

Powder River Basin, Illinois Basin, Central Appalachia and rail-delivered eastern coal.

Europe & Atlantic — 2

Northwest European import and South African export coal.

Coal and freight together

Dry bulk freight curves sit in the same dataset family as coal, so delivered coal cost can be built from one consistent source.

Seaborne thermal coal — US domestic coal

Front month → 3 years

Illustrative curve shapes. Not current prices.

Coal alongside gas and power

Coal is priced with the same methodology as EOX gas and power curves, supporting fuel-switching, generation-cost and delivered-cost analysis.

HOW IT'S BUILT & WHO USES IT

Built on Real Brokerage Activity

Calibrated by Statistical Modelling, Applied Consistently

Brokerage activity

Trades and quotes from BGC Group's energy and commodities brokerage desks anchor each curve where the market trades.

Public information

Publicly available information supplements observed activity with shapes, spreads and location relationships.

Statistical modelling

Long histories supply seasonal shapes, spreads and correlations, so every point on the curve is priced, liquid or not.

How a full EOX curve is built along its length. Illustrative; not market data.

A proprietary, rules-based algorithm marks every curve the same way, every run: not hand-marked, and independent of your own positions, which reduces self-pricing risk. EOX aims to correct any error within one business day, and can often republish within the hour.

Who uses EOX freight and coal curves

Teams that need an independent, defensible forward reference

Shipowners & charterers

Chartering decisions, voyage economics and fleet valuation.

Commodity traders & industrials

Delivered cost of crude, products, LNG, LPG and coal.

Utilities & generators

Coal procurement, fuel switching and generation cost.

Consultancies & lenders

Vessel and asset valuation, and market studies.

Typical applications

- Verifying internal marks and mark-to-market
- Voyage and delivered-cost analysis
- Chartering and fleet decisions
- Coal procurement and fuel switching
- Carbon cost on shipping
- Audit and governance support

DELIVERY & ACCESS

Every Way In, One Subscription

The Same Curves and Timestamps, Wherever You Pull Them

Every EOX subscription includes every delivery method, with historical curves at no extra charge. Subscriptions are priced by product complex, not by curve.

REST API
Per-user keys, JSON or CSV over HTTPS, with history on request.

Excel add-in
Curves, history and dates straight into your models with EOX formulas.

File downloads
Every end-of-day file, today's or historical, from a web browser.

FTPES
Secure file transfer for automated loads into ETRM and risk systems.

Email
Formatted daily files delivered to your inbox through the day.

Partner platforms
Enverus, DTN, ZEMA, Barchart, Abacus SATURN and Ventriks, licensed with EOX.

Freight & coal at a glance

Freight	50+ routes across tankers, gas carriers, dry bulk, containers
Coal	15 curves: US and seaborne
Depth	Curves to 3 years
Carbon	EU ETS-inclusive tanker routes

Publication

Intraday	Curves refreshed every 15 minutes through the trading day
Daily runs	Five scheduled publication runs, from 6:45 am to 4:00 pm US Central Time
History	Included with every subscription
Timing	Exact timing varies by dataset and delivery method

Want the curve-by-curve list?

This brochure summarises coverage. The complete list of curves in EOX freight and coal curves is available to clients and trial users: ask for it with your trial.

See EOX freight and coal curves in your own models

Request a trial and we'll set up access and send the full coverage list.
