EOX MARKET DATA · FORWARD CURVES

NGL & Petrochemical Forward Curves

Following the Barrel From Natural Gas Liquids to Petrochemical Feedstocks

Forward curves for propane, butanes, ethane, natural gasoline and olefins, from the major US storage hubs to Europe, the Middle East and Asia, built on real brokerage activity and calibrated by statistical modelling.

EOXLive

COVERAGE

From US Hubs to Asian Demand

Natural Gas Liquids and Petrochemical Feedstocks in One Dataset

By region

Mont Belvieu — **25**

The core US hub: propane, butanes, ethane, natural gasoline, NGL basket and olefins.

Conway, Edmonton & US Gulf — **12**

Midcontinent and Canadian propane, plus Gulf Coast storage and export points.

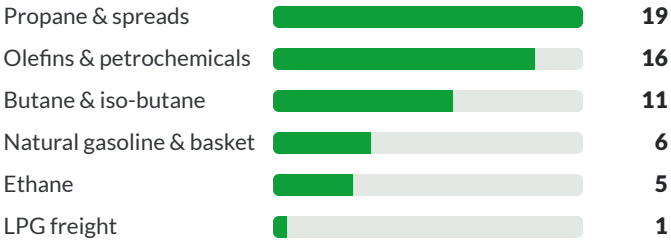

Europe — **5**

Northwest European LPG and feedstock pricing.

Middle East & Asia — **16**

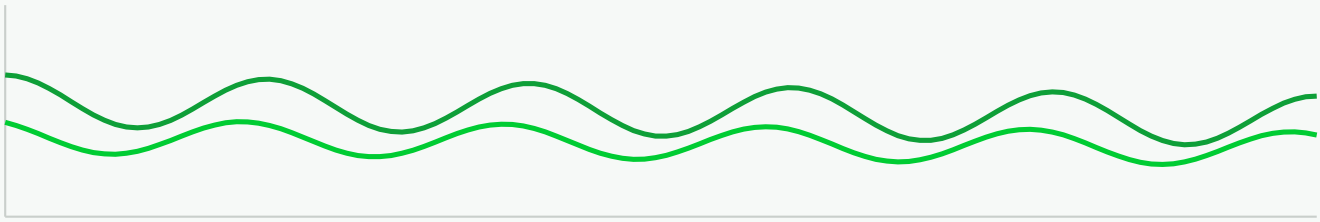

Gulf export LPG and Asian olefins and feedstocks.

By product family

Linked to freight

LPG shipping curves sit alongside the NGL dataset and in EOX freight, for delivered-cost and export arbitrage analysis.

US hub propane — Asian delivered LPG

Front month → 5 years

Illustrative curve shapes. Not current prices.

One consistent chain

NGLs are priced with the same methodology as EOX natural gas, crude and refined products, so processing margins and feedstock spreads can be built from one consistent set of curves.

HOW IT'S BUILT & WHO USES IT

Built on Real Brokerage Activity

Calibrated by Statistical Modelling, Applied Consistently

Brokerage activity

Trades and quotes from BGC Group's energy and commodities brokerage desks anchor each curve where the market trades.

Public information

Publicly available information supplements observed activity with shapes, spreads and location relationships.

Statistical modelling

Long histories supply seasonal shapes, spreads and correlations, so every point on the curve is priced, liquid or not.

How a full EOX curve is built along its length. Illustrative; not market data.

A proprietary, rules-based algorithm marks every curve the same way, every run: not hand-marked, and independent of your own positions, which reduces self-pricing risk. EOX aims to correct any error within one business day, and can often republish within the hour.

Who uses EOX NGL curves

Teams that need an independent, defensible forward reference

Processors & midstream

Processing margins, fractionation and storage valuation.

Petrochemical producers

Feedstock budgeting and cracker economics.

LPG exporters & traders

Export arbitrage and delivered-cost analysis.

Consultancies & lenders

Asset valuation and market studies.

Typical applications

- Verifying internal marks and mark-to-market
- Processing and fractionation margins
- Feedstock cost budgeting
- Export arbitrage analysis
- Storage and asset valuation
- Audit and governance support

DELIVERY & ACCESS

Every Way In, One Subscription

The Same Curves and Timestamps, Wherever You Pull Them

Every EOX subscription includes every delivery method, with historical curves at no extra charge. Subscriptions are priced by product complex, not by curve.

REST API
Per-user keys, JSON or CSV over HTTPS, with history on request.

Excel add-in
Curves, history and dates straight into your models with EOX formulas.

File downloads
Every end-of-day file, today's or historical, from a web browser.

FTPES
Secure file transfer for automated loads into ETRM and risk systems.

Email
Formatted daily files delivered to your inbox through the day.

Partner platforms
Enverus, DTN, ZEMA, Barchart, Abacus SATURN and Ventriks, licensed with EOX.

NGL curves at a glance

Curves	55+
Regions	US hubs, Canada, Europe, Middle East & Asia
Depth	Curves to 5 years
Families	Propane, butanes, ethane, natural gasoline, olefins

Publication

Intraday	Curves refreshed every 15 minutes through the trading day
Daily runs	Five scheduled publication runs, from 6:45 am to 4:00 pm US Central Time
History	Included with every subscription
Timing	Exact timing varies by dataset and delivery method

Want the curve-by-curve list?

This brochure summarises coverage. The complete list of curves in EOX NGL curves is available to clients and trial users: ask for it with your trial.

See EOX NGL curves in your own models

Request a trial and we'll set up access and send the full coverage list.
