EOX MARKET DATA · FORWARD CURVES

North American Natural Gas Forward Curves

Basis and Fixed-Price Curves From Major Hubs to Regional Delivery Points

Daily forward curves for more than 220 North American natural gas locations, across the Gulf Coast, Northeast, Midwest and West, published as basis to the benchmark and as outright prices, built on real brokerage activity and calibrated by statistical modelling.

gas forward curves	regions, US and Canada	daily curve depth	curves published monthly

COVERAGE

Every Major Basin, Every Delivery Point

From the Benchmark to Sub-Regional Points

EOX prices North American gas from the most liquid hubs through to regional and sub-regional delivery points, so thin locations get a full curve on the same footing as the hubs.

Gulf Coast

Texas and Louisiana production and market-area points, from ship-channel and South Texas hubs to Louisiana storage and pipeline points.

Midwest

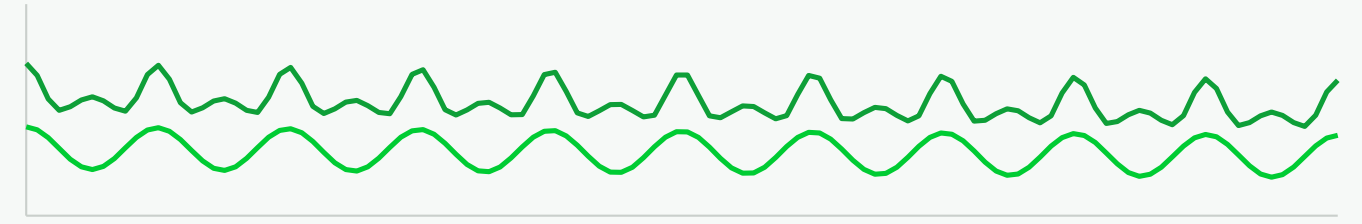

Midcontinent and Great Lakes points, from Chicago-area city gates to Midcontinent pipeline hubs.

Northeast

Appalachian supply and Northeast city-gate demand points, including New York and New England delivery.

West

Permian, Rockies, Pacific Northwest, California and western Canada, including the major Alberta hub.

Regional point (outright) — Basis to benchmark

Front month → 10 years

Illustrative curve shapes. Not current prices.

Basis and outright

Basis curves to the benchmark, plus fixed-price curves, so you can use whichever your models need.

Balance of month

A separate balance-of-month price for the rest of the current month, alongside the full forward strip.

Depth

Daily curves to 10 years, with a 20-year curve published monthly for long-dated contracts and asset valuation.

Connected to power, vols and heat rates

The same gas points feed EOX heat rates, implied volatilities and gas/power correlations, so gas, power and risk inputs line up across one consistent dataset.

HOW IT'S BUILT & WHO USES IT

Built on Real Brokerage Activity

Calibrated by Statistical Modelling, Applied Consistently

Brokerage activity

Trades and quotes from BGC Group's energy and commodities brokerage desks anchor each curve where the market trades.

Public information

Publicly available market information supplements observed activity with shapes, spreads and location relationships.

Statistical modelling

Long histories supply seasonal shapes, spreads and correlations, so every point on the curve is priced, liquid or not.

How a full EOX curve is built along its length. Illustrative; not market data.

A proprietary, rules-based algorithm marks every curve the same way, every run: not hand-marked, and independent of your own positions, which reduces self-pricing risk. EOX aims to correct any error within one business day, and can often republish within the hour.

Who uses EOX natural gas curves

Teams that need an independent, defensible forward reference

EOX North American power and gas curves are used by hundreds of organisations and thousands of users, from global energy companies to specialist consultancies.

Utilities & energy companies

Supply portfolio valuation, hedging and independent mark verification.

Producers & midstream

Pipeline capacity, storage and transport valuation across basins.

Consultancies

Basin studies, client valuations and expert reports on a consistent reference.

Large energy users

Procurement budgeting and contract benchmarking, including technology companies.

Typical applications

- Verifying internal marks and mark-to-market
- Pipeline capacity and storage valuation
- Supply and procurement budgeting
- Basis risk analysis
- Risk models: VaR, PFE and stress tests
- Audit and governance support

DELIVERY & ACCESS

Every Way In, One Subscription

The Same Curves and Timestamps, Wherever You Pull Them

Every EOX subscription includes every delivery method, with historical curves at no extra charge. Subscriptions are priced by product complex, not by curve.

REST API
Per-user keys, JSON or CSV over HTTPS, with history on request.

Excel add-in
Curves, history and dates straight into your models with EOX formulas.

File downloads
Every end-of-day file, today's or historical, from a web browser.

FTPES
Secure file transfer for automated loads into ETRM and risk systems.

Email
Formatted daily files delivered to your inbox through the day.

Partner platforms
Enverus, DTN, ZEMA, Barchart, Abacus SATURN and Ventriks, licensed with EOX.

Gas curves at a glance

Curves	220+ locations
Regions	Gulf Coast, Northeast, Midwest, West (incl. western Canada)
Depth	Daily curves to 10 years, plus 20-year curves published monthly
Prices	Basis and outright; balance of month

Publication

Intraday	Curves refreshed every 15 minutes through the trading day
Daily runs	Five scheduled publication runs, from 6:45 am to 4:00 pm US Central Time
History	Included with every subscription
Timing	Exact timing varies by dataset and delivery method

Want the curve-by-curve list?

This brochure summarises coverage. The complete list of curves in EOX natural gas curves is available to clients and trial users: ask for it with your trial.

See EOX natural gas curves in your own models

Request a trial and we'll set up access and send the full coverage list.
