EOX MARKET DATA · FORWARD CURVES

North American Power Forward Curves

Hub, Zone and Nodal Pricing Across 10 ISOs and RTOs

Daily forward curves for North American electricity, from the major trading hubs to zones and selected nodes, across every standard peak type plus custom hour blocks, built on real brokerage activity and calibrated by statistical modelling.

700+	10	10 yrs	20 yrs
power forward curves	ISOs and RTOs	daily curve depth	curves published monthly

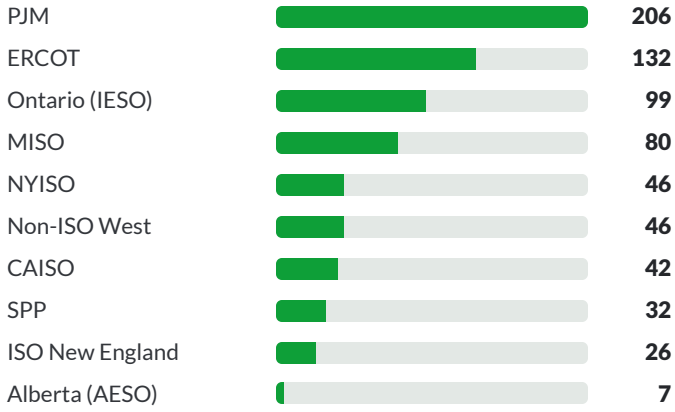

COVERAGE

Ten Markets, Every Shape

Hubs, Zones and Selected Nodes Across North America

EOX publishes more than 700 daily power curves. Each curve is one location and one peak type, so a single hub carries several curves: on-peak, off-peak, around-the-clock and more.

Curves by market

Counts are curve series, including peak-type variants.

Peak types and hour blocks

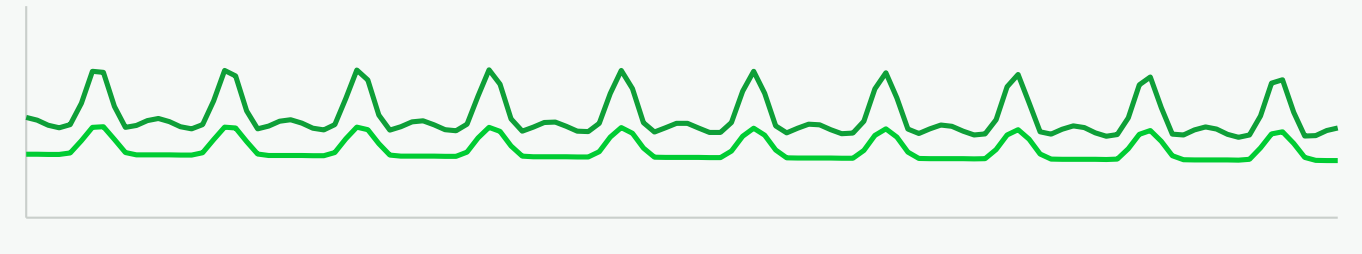

Standard and market-specific shapes, where each market trades them:

On-peak · Off-peak · Around-the-clock · Weekend peak · Night off-peak · Extended on-peak · Extended off-peak · Super peak · Flat · 7×16

Custom hour blocks, including solar-window and evening-ramp shapes in ERCOT and CAISO, for pricing renewable output and peak demand.

Contract terms

Monthly · Quarterly · Winter, spring & summer strips · Calendar years · Balance of month

Illustrative curve shapes. Not current prices.

Fields

Mid, bid and ask, plus an around-the-clock price and an implied heat rate on every power curve.

Depth

Daily curves to 10 years. A 20-year curve is published monthly, on the last business day, for long-dated valuation.

Canada included

Ontario and Alberta alongside the US markets, in the same format and on the same timetable.

HOW IT'S BUILT & WHO USES IT

Built on Real Brokerage Activity

Calibrated by Statistical Modelling, Applied Consistently

Brokerage activity

Trades and quotes from BGC Group's energy and commodities brokerage desks anchor each curve where the market trades.

Public information

Publicly available information, such as ISO/RTO data, supplements observed activity with shapes, spreads and location relationships.

Statistical modelling

Long histories supply seasonal shapes, spreads and correlations, so every point on the curve is priced, liquid or not.

How a full EOX curve is built along its length. Illustrative; not market data.

A proprietary, rules-based algorithm marks every curve the same way, every run: not hand-marked, and independent of your own positions, which reduces self-pricing risk. EOX aims to correct any error within one business day, and can often republish within the hour.

Who uses EOX power curves

Teams that need an independent, defensible forward reference

EOX North American power and gas curves are used by hundreds of organisations and thousands of users, from global energy companies to specialist consultancies.

Utilities & energy companies

Mark-to-market, hedging and independent price verification across generation and load.

Renewable developers

Power purchase agreement pricing and project valuation on 20-year curves and solar-window shapes.

Consultancies

Client models, valuations, market studies and expert reports on one consistent reference.

Technology companies

Long-term power procurement and contract benchmarking for data centres and large loads.

Typical applications

- Verifying internal marks and mark-to-market
- Power purchase agreement pricing
- Generation and asset valuation
- Retail and load pricing
- Risk models: VaR, PFE and stress tests
- Audit and governance support

DELIVERY & ACCESS

Every Way In, One Subscription

The Same Curves and Timestamps, Wherever You Pull Them

Every EOX subscription includes every delivery method, with historical curves at no extra charge. Subscriptions are priced by product complex, not by curve.

REST API
Per-user keys, JSON or CSV over HTTPS, with history on request.

Excel add-in
Curves, history and dates straight into your models with EOX formulas.

File downloads
Every end-of-day file, today's or historical, from a web browser.

FTPES
Secure file transfer for automated loads into ETRM and risk systems.

Email
Formatted daily files delivered to your inbox through the day.

Partner platforms
Enverus, DTN, ZEMA, Barchart, Abacus SATURN and Ventriks, licensed with EOX.

Power curves at a glance

Curves	700+
Markets	10 ISOs and RTOs, including Ontario and Alberta
Depth	Daily curves to 10 years, plus 20-year curves published monthly
Fields	Mid, bid, ask, around-the-clock, heat rate

Publication

Intraday	Curves refreshed every 15 minutes through the trading day
Daily runs	Five scheduled publication runs, from 6:45 am to 4:00 pm US Central Time
History	Included with every subscription
Timing	Exact timing varies by dataset and delivery method

Want the curve-by-curve list?

This brochure summarises coverage. The complete list of curves in EOX power curves is available to clients and trial users: ask for it with your trial.

See EOX power curves in your own models

Request a trial and we'll set up access and send the full coverage list.
